SUMMARY

Software Development Engineer with experience in **Java-based systems**, **MERN Stack**, **REST APIs**, and **database optimization**. Skilled in **concurrency handling** and designing **low-latency APIs** integrated into production systems **10K+ daily requests**. Proficient in implementing **JWT-based authentication** and **role-based access control (RBAC)**. Strong foundation in **Data Structures** and **system design fundamentals**.

EDUCATION

Degree/Certificate	Institute/Board	CGPA	Year
B.Tech. CSE	Indian Institute of Information Technology, Nagpur	7.5/10	2022-26

EXPERIENCE

SDE Intern – TripFactory

Jan 2026 - July 2026

Tech: Core Java, Spring Boot, React, JSP, Hibernate (ORM), PostgreSQL, JDBC, REST APIs

Bengaluru

- **Audited** legacy JSP codebase, resolved **broken API integrations** and optimized **PostgreSQL queries** across booking modules, reducing data errors by **40%** across **10K+** monthly transactions.
- **Built** Advisory Dashboard with **dynamic filters**, lead modals, and **live API polling**, cutting load time by **45%** for **50+** daily advisors.
- **Developed IAM module** with **RBAC** across **3** internal products, reducing access incidents by **50%**.
- **Engineered** Chrome Extension to **auto-fill booking forms** from traveler profiles, saving **2 hrs/day** for **15+** bookings.
- **Delivered** production frontend features fixing **10+** critical bugs across booking, search, and package pages, reducing post-release bug reports by **30%**.

PROJECTS

Nomads — Group-Based Travel Booking Platform

Nov 2025 - Dec 2025

Tech Stack: Spring Boot, Java, PostgreSQL, Next.js, Razorpay, Mapbox

[GitHub](#) | [Deploy](#)

- **Built** booking engine with **pessimistic locking**, eliminating double-booking under **50+** concurrent requests.
- **Reduced** booking latency by **35%** using async processing via Spring's **@Async** task executor.
- **Developed REST APIs** with **JWT** and **RBAC** for **3** user roles, achieving **<150ms** response time.
- **Integrated Razorpay** with **webhook-based** failure handling and live map updates via Mapbox.

Multi-Vendor Food Delivery App

Sept 2025 - Oct 2025

Tech Stack: MERN Stack, JWT, MongoDB

[GitHub](#) | [Deploy](#)

- **Built** multi-vendor platform with **vendor onboarding**, **product management**, and **RBAC** across **3** user types.
- **Designed REST APIs** with **<200ms** response time and **compound indexing** on MongoDB for fast queries.
- **Implemented JWT auth** and order tracking with **paginated responses** reducing payload by **50%**.

Real-Time Chat Application

July 2025 - Aug 2025

Tech Stack: React, Node.js, Express, MongoDB, Socket.io

[GitHub](#) | [Deploy](#)

- **Built 1-1 and group messaging** supporting **100+** concurrent users via **Socket.io** room-based architecture.
- **Implemented online presence tracking** and message delivery with sub-**100ms** latency under normal load.
- **Added JWT auth**, persistent chat history, and **lazy-loaded** pagination reducing load time by **40%**.

SKILLS

- **Languages:** Java, C++, JavaScript, Python, C
- **Backend Development:** Spring Boot, Hibernate (ORM), Node.js, Express.js, REST APIs, JWT
- **Frontend Development:** React.js, Next.js, CSS
- **Databases:** PostgreSQL, MongoDB, MySQL, **Indexing**, Query Optimization
- **System Design & Architecture:** RBAC, Concurrency, Low-Latency Design, Load Balancing
- **Core Computer Science:** Data Structures & Algorithms, Operating Systems, DBMS, OOP
- **Tools & DevOps:** Docker, Git, Postman

ACHIEVEMENTS

- Solved **400+** **DSA** problems across **LeetCode (Rating: 1630+)** and **GFG** with proficiency in **DP**, **Graphs** and **Trees**.
- Won **INTSO National Gold Medal (Top 1% nationwide)** and secured top ranks in **EAMCET (TS: 2036, AP: 2218)**.
